OneGov

COMMUNITY DEVELOPMENT PLATFORM

DOCUMENT WORKFLOW AUTOMATION

With OneGov, any document, form, license, or permit can be built into a unique workflow process, automating submittal, review, approval, inspections and reporting. With customers from small cities to large agencies, OneGov provides the flexibility and scalability to handle virtually any document and workflow process.

Create a full civic engagement platform, allowing the public to quickly and easily access and utilize government licensing, permits, forms, and property information. Generate custom permit and worksite cards that can be easily printed or viewed online.

Setup expiration timelines and custom email notifications to notify both internal staff and permit applicants of status changes, notes, reminders, and more.

INTEGRATIONS AND PROPERTY MANAGEMENT DATABASE

Integrate payment systems, GIS mapping, property/tax systems, and document archival applications to bring all data into a single platform. View permits, historical records, parcel sketches, and property details all from a single search screen.

Customize viewing privileges down to the field level, allowing the public, permit applicant, and internal staff to see data relevant to their needs. Track data versions to see when changes were made and by whom, providing complete application oversight.

SUMMARY

OneGov provides local government agencies with an enterprise-wide permit, license, and document management platform that encourages automation and civic engagement.

BENEFITS

- ✓ SaaS via Amazon Web Services or locally installed in a virtual environment
- ✓ Constituents can easily use and access valuable government services
- ✓ Completely customize forms, reports, workflows, inspections, and access rights

COMMUNITY DEVELOPMENT PLATFORM

INTELLIGENT INSPECTIONS

Customize inspection forms, per permit type, and optionally pull in data from the permit or license form to easily compare data. With mobile-access, enter inspection data, take photos, and add recordings from virtually any device. Use mapping tools or GIS integrations to plot locations. Sketch areas using built in coordinate locators or use centimeter-level, accurate GPS technology (X, Y and Z coordinates.

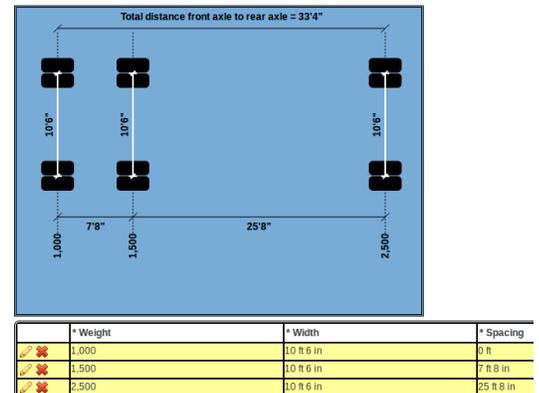

BUSINESS ANALYTICS

Using business analytic reporting, query permit and license revenue, inspection workloads, and more. Create custom reports that can be shared with internal staff, other agencies, or the general public. Generate calendars to show permit dates and inspection timelines, as well as community and park reservations.

PERMIT, LICENSE, & FORM AUTOMATION
Currently in use for:

- ✓ Risk Assessment Documentation
- ✓ Tobacco & Fireworks Licenses
- ✓ Public Hearing and Study Requests and Concern/Complaint Submittals
- ✓ Highway Permits: Utility, Moving, Access, and many more
- ✓ Planning & Zoning Permits: Land Use, Variance, Conditional Use, Zoning, Septic Sewer, and many more
- ✓ Birth & Death Certificate Requests
